

VIEW™ | Control Interface

NS-CL100 - RS-232/IR Control Interface

ClearOne®

In addition to providing exceptional IP-based audio/video distribution, VIEW also creates the perfect platform for connecting to best of breed subsystems. Tie in lighting, HVAC or a security system. The NS-CL100 acts as an interface between VIEW and an IR, RS-232 or IP based subsystem.

ADVANTAGES

- + Supports three protocols: IR, IP, and RS-232. Includes a built in IR Receiver and does not require additional hardware for IR learning.
- + User interface screens for common sub-systems are built into the VIEW Control Interface. This reduces the time needed to program each subsystem.
- + Built-in voltage sensing port.
- + Supports the standards-based programming language LUA. For more advanced two-way RS-232 or IP communications to a subsystem, a driver is written in LUA and then loaded onto the NS-CL100. Many drivers are already included with the setup software including:
 - + Lutron RadioRA® , Homeworks®, GraphiK Eye®
 - + Aprilaire®
 - + GE Concord®
 - + Vantage®
 - + Secant®
 - + Mode Lighting
 - + Rako
 - + Sensible Heat
 - + Furtonix®
 - + Helvar
 - + Leax
 - + Konnex EIB (lighting only)

IP-BASED ZONE
CONTROLLER

APPLICATIONS

- + HVAC Control
- + Lighting Control
- + RS-232 / IP Control of AV Devices
- + Power Sensing
- + IR Control

The Power of AV over IP™
