Application

The A-Line EMW410A-B is ideal for use in medium to large venues where excellent speech or live music reproduction is required. When used in conjunction with the A-Line EM806A-B line array speaker system to form an EMMA system, it can be used in the following applications.

- Houses of Worship
- Medium to Large Indoor/Outdoor Music Venues
- Medium to Large Auditoriums
- Banquet Halls
- Theaters
- Large Meeting Rooms
- Clubs

General Description

The Atlas A-Line EMW410A-B line array system is a 1000W RMS powered subwoofer speaker system that is designed for use in speech and music reproduction applications for medium to large venues like houses of worship, theaters, or halls in conjunction with the EM806A-B full range speaker system. The unit incorporates four 10" subwoofers with an integrated class D amplifier capable of delivering 1000W RMS power with pre-configured DSP for optimal sound reproduction. The cabinet design has integrated carry handles for easy transport and is finished in heavy duty black Duracoat™. The EMW410A-B is designed to be used with the EM806A-B full range speaker system for a truly unmatched 3-way sound experience.
