Optical DisplayPort Extension Cable

*** Point-to-point optical fibre cable ***

Description

The DisplayPort standard - which defined by VESA (Video Electronics Standard) - is an attractive alternative to digital display interface such as HDMI and DVI. Optical technology for this transmission stretches the performance beyond the limitations of copper wire with longer length, data security, negligible RFI/EMI and the elimination of costly analog distribution systems.

DisplayPort supports single-lane transfer rates as fast as 2.7 Gbps across as many as four data pairs for a maximum of 10.8 Gbps over a single cable. These features combine with support for color depth as great as 16 bits per color channel to give designers the option of improving image quality in applications that require screen resolution of as much as WQXGA (2560×1600), as well as increasing refresh rates to 120 Hz. The DisplayPort interface also carries embedded clock signals and provides a bidirectional auxiliary channel operating at 1 Mbps to enable link management and device control to comply with VESA's EDID (extended-display-identification) and MCCS (monitor-control-command-set) standards.

The M1-5000 consists of a transmitter and a receiver module, one side is connected by our creative multi channels optical connector and the other side is connected by short male DisplayPort copper cable. M1-5000 is fully compatible with DisplayPort 1.1.

The shipping group is as follows;

- 1) One DP cable: M1-5000-xxx, where x = length in metres.
- 2) Factory will stock "standard" lengths of 10m, 20m, 30m, 40m, 50m, 70m and 100m.
- 3) AC/DC power adaptor +5V : 1ea

Terminology

DISPLAYPORT	Digital display interface standard put forth by the Video Electronics Standards Association (VESA) since 2006. It defines a new royalty-free, digital audio/video interconnect, intended to be used primarily between a computer and its display monitor, or a computer and a home-theater system.
EDID	Extended Display Identification Data. EDID parameters are sent over the DDC link.
EMI	Electro Magnetic Interference.
EMS	Electro Magnetic Susceptibility.
MCCS	Monitor Control Command Set standard (VESA)
RFI	Radio Frequency Interference.
WQXGA	Display resolution of 2560×1600 pixels with a 16:10 aspect ratio or 2560×1440 with 16:9 aspect ratio (1440p). The name comes from the fact that it is a wide version of QXGA and has four times as many pixels as an WXGA display.
