

APART MPBD20-G BI-DIRECTIONAL SOUND PROJECTOR

APart

The APart MPBD20-G is a stylish bi-directional 100 Volt sound projector with a unique design. It is equipped with two 5" moisture resistant full range speakers. The speaker quality is such that you can use this sound projector in a wide variety of applications from paging calls to background music. The woofers are placed under an angle, what results in higher intelligibility and less reflection. This sound projector is ideal for use in corridors, train platforms, warehouses, shopping streets,...

MPBD20-G is IP64 rated, which makes it fully weatherproof. The housing is made out of smooth, dirt repellent ABS plastic and all metal parts are either stainless steel or aluminum: an absolute guarantee against rust.

The MPBD20-G has a multipositioning bracket that allows pole mounting, but also installation on a ceiling, wall, or in a corner. Quick-fit cable clamps permit easy installation. The standard color of this speaker is grey. Optionally, it can be painted in any RAL color from a minimum of 12 pieces (ref.:PAINTMP)
