

UFO 2011 Table-top Chairman Unit (w/o Voting, w/o LCD)

The **UFO 2000 Series** is the latest digital conference microphone system with PC control. It provides the same advantages of our FCS system with the added benefit of using CAT-5 connector cables. This can dramatically reduce cable clutter around tables and cable throw lines on the floor, which improves aesthetics and manageability. It's perfect for a corporate discussion room, equipment rental companies that require basic and affordable one.

The **UFO 2000 Series** can execute Auto-Image Tracing connected with the High Speed Dome without external devices via RS-485 communication interface. It saves your installation time and the extra cost.

- **Design Concept from Superyacht**
- **Cost-effective structured CAT-5e cabling**
- **Provides Fixed/Pluggable gooseneck microphone for easier installation and maintenance**
- Provides **25** classic metallic colors for all kinds of conferencing décor
- Chairman Unit can be linked anywhere within the chain, max. up to **10** units

- Chairman features having "**Priority**" speak button to override delegate and the alarm sound when delegate-off
