

# VC3102

100 Watt Volume Controller

## AUDAC

### ► Features

- Flexible system
- 100 Watt power rating
- 11 steps of 3dB
- Built in relay for priority signals
- Slim design
- Blends beautifully into walls
- Easy installation

### ► Applications

- Private houses
- Industrial buildings
- Offices
- ...

The VC3102 is a 100 Volt volume controller which can handle a power of up to 100 Watt.

The volume is adjustable with a rotatable knob in 11 steps of 3dB.

It is equipped with a relay and separate input for the reception of 24V priority signals. This means that when a priority signal occurs, the volume will be automatically switched to maximum level. This can be very useful for emergency and evacuation messages.

Due to its slim and good looking design, these volume controls will blend into all kinds of different environments or interiors.

The construction is made of sturdy ABS and therefore suitable for big projects in industrial buildings as well as standard home interiors.

The dimensions are 80 mm x 80 mm, and a built-in depth of 46 mm is required.

The connections are made at the back with screw clamp connectors.

### ► Specifications

| SYSTEM SPECIFICATIONS               |                   |
|-------------------------------------|-------------------|
| Max handling power                  | 100 W             |
| Max. operation voltage              | 100 V             |
| Attenuation                         | 11 x 3 dB         |
| Relay                               | 24 V - 25 mA      |
| Priority Input                      | 24V DC            |
| PRODUCT FEATURES                    |                   |
